<b>Office Action Summary</b>	<b>Application No.</b> 10/562,209	<b>Applicant(s)</b> HUNT ET AL.	
	<b>Examiner</b> Dean J. Kramer	<b>Art Unit</b> 3652	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. More specifically, there are no drawings included with this application. 35 U.S.C. 113 requires that applicant furnish a drawing where necessary for the understanding of the subject matter sought to be patented.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 17-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no clear antecedent basis for "said second gripping means" (claim 17), "said first gripping means" (claim 19), or "the first and second gripping means" (claim 23).

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3, 5-9, 13-15, 23, and 24, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Hujsak et al. (4,177,964).

The patent to Hujsak et al. shows a device comprising a first gripping or engaging means (38), a second gripping means (26), and extension means (24).

7. Claims 1, 2, 8-11, 13-15, 17, 18, 23, 24, and 27, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent No. 05-245781.

Japanese Patent No. 05-245781 shows a pair of gripping means (6) and extension means (22,23,39).

8. Claims 1-3, 8-16, 23, 24, and 27, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent No. 10-274697.

Japanese Patent No. 10-274697 shows a first gripping means in the form of a hook (31), a second gripping means (3), and a cutter for opening a container as described in paragraph [0013].

***Claim Rejections - 35 USC § 103***

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 3-7, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent No. 05-245781 in view of Japanese Patent No. 08-192923.

Japanese Patent No. 05-245781 contains a cylindrical recess (see Figs. 3 and 4) adapted to encompass a waste container (12).

Japanese Patent No. 08-192923 shows a device for carrying a waste container comprising a sleeve adapted to encompass the container and a plurality of fingers (9) which can engage with the lower part of the container.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide fingers similar to those shown in the Japanese ('923) patent on the lower part of the recess of the ('781) patent in order to more securely grip a container.

***Drawings***

11. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the first gripping

Art Unit: 3652

means, the second gripping means, the extension means, the cylindrical device, the sleeve, the elongated members, the pivoting means, the long blades, the flexible arm, the manipulator arm, the wire cutter, the collection means, the removable pouch, the spring-loaded closure, the winch mechanism, the umbilical device, and the telescopic mast must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

12. The abstract of the disclosure is objected to because it contains legal phraseology such as “means” which should be avoided. Correction is required. See MPEP § 608.01(b).

***Conclusion***

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of the remaining cited references shows a recovery device having at least two separate gripping means.
